

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1-39. (Cancelled)

40. (Original) A method in a computing system for modifying a user interface displayed on a display device, the method comprising:

receiving an indication from the computing device to modify the user interface;

displaying an identification block;

displaying a record toolbar;

displaying a note pad; and

displaying a note tab.

41. (Original) A method according to claim 40, wherein the step of displaying an identification block includes displaying information regarding a currently running application in the identification block.

42. (Original) A method according to claim 40, wherein the step of displaying a record toolbar includes displaying a record button, a stop button, a play button, a fast forward button, and a rewind button.

43. (Original) A method according to claim 42, wherein the step of displaying a record toolbar further includes displaying a status bar indicating a relative length of a recording.

44. (Original) A method according to claim 41, wherein the step of displaying a note pad includes displaying both text data and an icon referring to an embedded voice note.

45. (Original) A method according to claim 41, wherein the step of displaying a note tab includes displaying a note tab to provide an indication to a user that the user is in a record portion of a currently running application.
46. (Original) A display device having rendered thereon a user interface for displaying an embedded voice note, comprising:
- an identification block;
 - a record tool bar;
 - a note pad; and
 - a note tab.
47. (Original) A display device according to claim 46, wherein the identification block includes information regarding a currently running application.
48. (Original) A display device according to claim 46, the record tool bar includes a record button, a stop button, a play button, a fast forward button, and a rewind button.
49. (Original) A display device according to claim 48, wherein the record toolbar further includes a status bar indicating a relative length of a recording.
50. (Original) A display device according to claim 46, wherein the note pad includes both text data and an icon referring to an embedded voice note.
51. (Original) A display device according to claim 46, wherein the note tab includes an indication to a user that the user is in a record portion of a currently running application.
